

Rekenen met tientallen

1. Optellen:

$$30 + 20 = \square$$

$$40 + 30 = \square$$

$$20 + 50 = \square$$

Reken nu uit zonder hulp van de bolletjes.

$$40 + 10 = \square$$

$$20 + \square = 70$$

$$\square + 20 = 50$$

$$\square + \square = 90$$

$$20 + 60 = \square$$

$$10 + \square = 40$$

$$\square + 10 = 30$$

$$\square + \square = 80$$

$$30 + 30 = \square$$

$$50 + \square = 90$$

$$\square + 40 = 80$$

$$\square + \square = 70$$

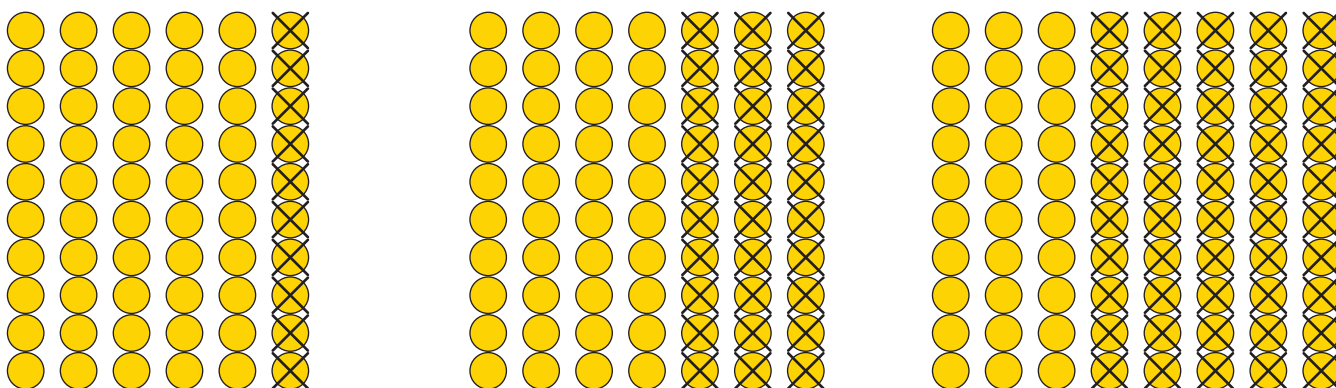

$$10 + 70 = \square$$

$$30 + \square = 80$$

$$\square + 30 = 60$$

$$\square + \square = 60$$

2. Aftrekken:

$$60 - 10 = \square$$

$$70 - 30 = \square$$

$$80 - 50 = \square$$

Reken nu uit zonder hulp van de bolletjes.

$$70 - 20 = \square$$

$$60 - \square = 20$$

$$\square - 20 = 50$$

$$\square - \square = 10$$

$$60 - 30 = \square$$

$$50 - \square = 40$$

$$\square - 10 = 30$$

$$\square - \square = 20$$

$$80 - 70 = \square$$

$$90 - \square = 10$$

$$\square - 30 = 40$$

$$\square - \square = 30$$

$$90 - 40 = \square$$

$$70 - \square = 70$$

$$\square - 40 = 20$$

$$\square - \square = 40$$
