

## Tientallen overschrijden

1. Reken eerst vooruit (optellen), naar het volgende tiental:

$$14 + 9 = \square$$

$$14 + \square = 20 + \square = 23$$

$$17 + 5 = 17 + \square + \square = \square$$

$$16 + 9 = 16 + \square + \square = \square$$

$$14 + 10 = 14 + \square + \square = \square$$

$$18 + 6 = 18 + \square + \square = \square$$

$$15 + 9 = 15 + \square + \square = \square$$

$$17 + 9 = 17 + \square + \square = \square$$

$$14 + 7 = 14 + \square + \square = \square$$

$$19 + 7 = 19 + \square + \square = \square$$

$$16 + 5 = 16 + \square + \square = \square$$

$$13 + 8 = 13 + \square + \square = \square$$

2. Reken eerst terug (aftrekken), naar het volgende tiental:

$$24 - 7 = \square$$

$$24 - \square = 20 - \square = 17$$

$$21 - 6 = 21 - \square - \square = \square$$

$$24 - 8 = 24 - \square - \square = \square$$

$$27 - 9 = 27 - \square - \square = \square$$

$$22 - 5 = 22 - \square - \square = \square$$

$$26 - 7 = 26 - \square - \square = \square$$

$$23 - 9 = 23 - \square - \square = \square$$

$$25 - 7 = 25 - \square - \square = \square$$

$$28 - 10 = 28 - \square - \square = \square$$

$$22 - 8 = 22 - \square - \square = \square$$

$$21 - 7 = 21 - \square - \square = \square$$

3. Gemengde opgaven:

$$15 + 7 = 15 + \square + \square = \square$$

$$25 - 9 = 25 - \square - \square = \square$$

$$21 - 5 = 21 - \square - \square = \square$$

$$17 + 6 = 17 + \square + \square = \square$$

$$23 - 8 = 23 - \square - \square = \square$$

$$22 - 9 = 22 - \square - \square = \square$$

$$12 + 9 = 12 + \square + \square = \square$$

$$24 - 8 = 24 - \square - \square = \square$$

$$16 + 6 = 16 + \square + \square = \square$$

$$18 + 9 = 18 + \square + \square = \square$$
